KARTIKEYA BABARAOJI WARHADE

+91 9960984774 | keyawarhade@gmail.com | Nagpur, Maharashtra | linkedin.com/in/kartikeya-warhade | github.com/KartikeyaWarhade2002

PROFESSIONAL SUMMARY

Aspiring Data Analyst with hands-on experience in Python, SQL, and data visualization, building end-to-end analytics solutions and automated reporting pipelines. Skilled in transforming raw datasets into actionable insights through statistical analysis, machine learning, and interactive dashboards built with real-world data.

SKILLS

Languages: Python, SQL
Data Analysis & Reporting: Pandas, NumPy, EDA, Power BI, Microsoft Excel
Visualization: Matplotlib, Seaborn, Power BI
Databases: MySQL, PostgreSQL, SQLite
Machine Learning: Scikit-learn, Predictive Modelling, NLP
Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Streamlit

WORK EXPERIENCE

Motion Graphics Designer | Dnnovate Technologies, Pune **Jun 2024 – Aug 2024**

- Led a small creative team and managed end-to-end project delivery, developing strong problem-solving, project management, and client communication skills.

Creative Technology Intern | Dnnovate Technologies, Pune **Jan 2024 – Mar 2024**

- Represented college at **India Gaming Show IGS 2024, Pune** — CII-backed national expo with 28,500+ attendees, including NVIDIA, Sony PlayStation, and Krafton; demonstrated a team-built solution on the national stage.

Python Programming Intern | YBI Foundation, Remote **Jun 2022 – Aug 2022**

- Completed structured Python training covering data structures, OOP, and algorithmic problem-solving through practical assignments.

PROJECTS

India Gaming Ecosystem Intelligence Platform | Python, Pandas, Scikit-learn, NLP, SQLite, Streamlit

End-to-end ML platform analyzing the Indian gaming ecosystem — recommendations, sentiment analysis, and market analytics.

- **Machine Learning & Analytics**: ML pipeline on **20,000+ records** — Random Forest (**84% accuracy**, 5-fold CV), Cosine Similarity recommendations, VADER NLP sentiment analysis, SQL-powered market analytics.
- **Deployment**: Interactive Streamlit dashboard delivering real-time gaming ecosystem insights through visualizations.

Universal Data Quality Auditor and Auto-Cleaning Pipeline | Python, Pandas, Scikit-learn, Streamlit

Detects and fixes dataset issues — missing values, duplicates, type mismatches, outliers, domain violations, and invalid categories.

- **Detection**: **8-issue detection system** using IQR analysis, domain validation, and Isolation Forest ML; **quality score out of 100** with severity-tagged deductions and downloadable JSON audit report.
- **Automation**: Pipeline enforces domain rules, standardizes casing, removes invalid categories, and produces a full audit trail — eliminating manual data preparation.

Smart Auto-Analytics and Insights Generator | Python, Pandas, NumPy, Matplotlib, Seaborn, Streamlit

Auto-profiles any CSV or Excel file — delivers insights, visualizations, anomaly detection, and plain-English queries instantly.

- **Insights Engine**: Surfaces up to **8 plain-English insights** detecting correlations, IQR outliers, category imbalances, and variability; includes auto-generated visualizations and dual-mode anomaly detection.
- **Query Engine**: Maps plain-English questions to Pandas operations — average, sum, top-N, correlation, and statistical summaries with no code required.

CERTIFICATIONS

Data Analytics in Python – NPTEL | Big Data Computing – NPTEL | Python for Beginners – Simplilearn

RDBMS with PostgreSQL – IIT Bombay | Python Fundamentals – Great Learning | AWS for Beginners – Great Learning

ACHIEVEMENTS

India Gaming Show 2024, Pune: Selected to represent the college at a CII-backed national expo with **28,500+ global attendees**, presented a team-built technical solution alongside NVIDIA, Sony PlayStation, and Krafton.
